This questionnaire is part of a thesis survey being conducted by [REDACTED] at the Naval Postgraduate School as partial fulfillment of the requirements for the degree of Master of Arts in National Security Affairs.

The purpose of this study is to ascertain the subjects, frequency and degree of information exchanged between U.S. and Warsaw Pact scientists concerning the field of parapsychology and thereby produce an independent and objective evaluation of the magnitude of interest generated in this field. By polling you and approximately 200 of your colleagues who have similarly authored articles or books on this field, an assessment can be made on how much and how often information is being exchanged on this highly controversial subject.

The term parapsychology, as used here, refers to the statistical, psychological and physiological aspects of unusual (paranormal) mental perception or influence between living organisms and the surrounding environment without the mediation of the known sense organs or of presently identified energy-transfer mechanisms.

Therefore, it is vital to the completion of this thesis that you take a few minutes of your time to complete this questionnaire and ensure that the results will be representative and significant.

What you answer to any question will be kept STRICTLY CONFIDENTIAL and will be handled as privileged information. DO NOT SIGN YOUR NAME. Completed questionnaires will be tabulated and analyzed by the candidate and only summaries will be reviewed in providing the needed information.

Will you please mail the completed questionnaire in the attached envelope within a week? If you desire a copy of the results, write your name and address on a separate piece of paper and either include it in the envelope or send it under separate cover.

Thank you for your assistance.
